Airports of Thailand Public Company Limited

Airports of Thailand Public Company Limited Announcement on Airport Environmental Management Policy

With our commitment to manage and operate airports by adhering to the best practices on airport environmental management and to become international airports that are sustainable and friendly to the environment and the community, Airports of Thailand Public Company Limited (AOT) has formulated environmental management policy as follows:

1. AOT shall preserve the environment in compliance with environmental mitigations and monitoring measures, which are stated in Environmental Impact Assessment (EIA) and Environmental and Health Impact Assessment (EHIA) Reports, approved by the National Environment Board.
2. AOT shall run airport business, related activities and services by considering environmental concerns beyond national and international regulations and standards.
3. AOT shall monitor environmental quality as well as develop a system for data collection, reporting and verification to enhance transparency and disclosure of airport environmental system.
4. AOT shall plan the development of airports and related facilities under AOT's responsibility through design, construction and operation processes to increase efficiency of energy consumption and resources utilization by adopting new green innovation or technology throughout airports' system.
5. AOT aims to achieve low-carbon airports by adopting global carbon reduction target while integrating climate change adaptation measures into current airports operation and the design of new facilities.
6. AOT shall install waste management system that covers entire waste cycle by applying circular economy principle to maximize the efficiency of resources utilization in every operation in order to minimize waste for disposal.
7. AOT ...

7. AOT shall engage and guide AOT staff and all stakeholders including subsidiaries, business partners, concessionaires, contractors, suppliers and other outsourcing partners to increase value of services while reducing environmental footprint throughout their operations and logistics.

8. AOT shall include environmental management cost as a part of due-diligence, mergers or acquisitions process (if any).

Announced on June 12th, 2019

(Mr.Nitinai Sirisamatthakarn)

President

Airports of Thailand Public Company Limited
